

# LE NGUYEN NHAT TRUNG

Front End Developer

## SUMMARY

I am a Front End Web Developer. Passionate about new technologies, I am particularly interested in modern framework and excited to learn it by my self. I have experience in HTML, CSS and Javascript general and Javascript framework in particular. Sometimes, I also work as backend developer for needs of project, such as Nodejs (Express), PHP.

My goal is to plan, build, test, deploy and maintain websites and applications for mobile devices (hybrid app).

Looking for a company which will challenge my knowledge and problem solving skill and allow me to continue develop my potential.

I hope you will consider my resumé favorably and consider me for the position. I look forward to hearing from you.

Major Duties:

- Take apart meeting daily.
- Implement new features, fix bug.
- Find solutions for enhancement web.

Technologies Utilized:

- Angular 1, angular-pdf-viewer
- Sass
- Gulp

### **PLDM**

Production Line Development Management (PLDM) is made based on SCC' requirement. There are two main processes to be mentioned here and they are customer suggestions and designer tasks. PLDM should be intended to cover all activities under stages of task management (design, modelling and test production) and SCC integration.

Position: Web Developer

Major Duties:

- Collect actual requirement from tailor and designer.
- Implement SCC integration
- Manage style fashions, costs

Technologies Utilized:

- Angular 1

- Sass
- Gulp

## **SCC**

Customize Fashion House will be revolutionizing the custom clothing industry. Using a unique technology, Customize Fashion House will allow everyone to afford tailor made clothing with the precise fit that is impossible to obtain from ready to wear. By using 3D scanning you will be able to review suitable clothes.

Position: Web Developer

Major Duties:

- Take apart meeting daily.
- Implement new features, fix bug.
- Find solutions for enhancement web.

Technologies Utilized:

- Angular 1, Spritespin, mPDF
- Sass
- Gulp
